

Additional information to **4CA025**

Besides the wetland types mentioned on the RIS, wetland type M, freshwater rivers and streams, occurs according to the “ecological features” section.

Criteria: 1a, 2b, 2c, 3a, 3b, 3c

Justification of some of the criteria:

3c: During fall migration, the site regularly supports over 1% of the populations of the *Anser caerulescens caerulescens*, *Anas rubripes*, *Anas acuta* and *Anas crecca carolinensis*.

Both Moose River and Hannah Bay fall under IUCN category IV.
